17. ABSTRACT (MAX. 250 WORDS)

This report of the second nationwide survey of students enrolled for advanced degrees presents data collected in the fall of 1960 from 605 institutions of higher education (a 100 percent response from institutions with students enrolled for advanced degrees). Although the initial survey was confined primarily to the fields of science, mathematics, and the health profession, the 1960 survey was expanded to collect enrollment data on all fields in which advanced degrees are conferred. Selected data on enrollments at all levels and data on earned degrees conferred are also included for purposes of comparison.

Highlights

In the fall of 1960, students enrolled for advanced degrees were reported in 605 of the nation's colleges and universities—an increase of 33 (6 percent) from the fall of 1959. The 605 institutions were distributed as follows: 143 universities, 206 liberal arts colleges, 110 teachers colleges, 27 technological schools, 65 theological and other religious schools, 27 schools of art, and 27 other independently organized professional schools.

✦ ✦ ✦

Total enrollment for advanced degrees in the fall of 1960 was 314,000—an increase of 9,500 (3 percent) from the fall of 1959. The number and proportion of these students pursuing full-time programs of study was 125,000 (40 percent) in 1960, and 115,000 (38 percent) in 1959.

✦ ✦ ✦

The 314,000 students were distributed as follows: 197,000 (63 percent) in their first year of work for an advanced degree; 13,000 (4 percent) in the last year for the doctorate, and 104,000 (33 percent) who had completed one or more years of work for an advanced degree (i.e., master's except first-professional or doctorate degree) but who were not yet in the last year for a doctorate. The Office of Education has estimated that approximately 10,500 doctorates were conferred during 1960–61.

✦ ✦ ✦

The 10 largest institutions accounted for 22 percent of the enrollment for advanced degrees. Total enrollment for advanced degrees was distributed among the various types of institutions as follows: 70 percent in universities, 16 percent in liberal arts colleges, 8 percent in teachers colleges, 4 percent in technological schools, 1 percent in theological and other religious institutions, and 1 percent in schools of art and other independently organized professional schools.

✦ ✦ ✦

Total enrollment for advanced degrees was about equally divided between public and private institutions in the fall of 1959—52 percent and 48 percent, respectively. One year later, in the fall of 1960, the proportion had changed to 55 percent public and 45 percent private.

✦ ✦ ✦

Within the broad areas of study included in both the fall 1959 and the fall 1960 surveys, the largest percentage increases were reported in the health professions, 30 percent; geography, 23 percent; mathematics, 21 percent; and psychology, 19 percent. The smallest increases were reported in agriculture, 2 percent; and forestry, 5 percent.

Foreword

THIS CIRCULAR presents data obtained by the Office of Education in its second nationwide survey of students enrolled for advanced degrees. The purpose of the survey is to meet the need for data bearing on the expected flow of graduate students into the world of employment. The data are needed by the National Science Foundation, the National Institutes of Health, and the U.S. Office of Education for planning fellowship, training, research, and facilities programs. These data will also be useful to other public and nonpublic organizations with an interest in graduate education and to those responsible for administration of our colleges and universities.

The initial survey on enrollment for advanced degrees in the fall of 1959 was confined primarily to the fields of science, mathematics, and the health professions. The survey for the fall of 1960 was expanded so as to collect enrollment data on all fields in which advanced degrees are conferred.

Several related studies of the U.S. Office of Education dealing with programs of study are available for analyzing enrollments and degrees by field. A few closely related ones are the Junior-Year Science and Mathematics Survey, Engineering Enrollments and Degrees Survey, and the Survey of Earned Degrees Granted. Together, these surveys show the extent to which students advance from one level of study to another in various fields of study. Selected data on enrollment at all levels, and data on earned degrees conferred are presented and discussed in this report along with data on enrollment for advanced degrees for purposes of comparison and analysis.

Collection and verification of original data was the responsibility of Mabel C. Rice, Head, Statistical Services Unit; Hazel C. Poole, Supervisor, Statistical Services Unit; and Geraldine J. Scott and Ertie Barnes, Report Analysts. Finally, for their excellent cooperation in supplying data on which this circular is based, grateful appreciation is expressed to the registrars, deans of graduate schools, and department heads in the 605 institutions of higher education which had students enrolled for advanced degrees in the fall of 1960.

It is a pleasure this year, as before, to report that all of the institutions with students enrolled for advanced degrees responded to the Office of Education's request for data. The Office is deeply appreciative of this splendid cooperation.

VIRGIL R. WALKER
Acting Director,
Division of Educational Statistics

RALPH C. M. FLYNT,
Associate Commissioner for
Educational Research and Development.

Enrollment for Advanced Degrees: Fall 1960

Introduction

THIS REPORT on enrollments for advanced degrees is the second in a recent series of annual reports on this subject conducted by the Office of Education. The reports in this series present and analyze annually significant information relative to enrollments for advanced degrees—an area of American higher education which has not previously been covered comprehensively by systematic statistical data.

The National Science Foundation and the National Institutes of Health, agencies with specific operational needs for information on the composition of the graduate student body, requested the Office of Education to conduct periodic surveys of students enrolled for advanced degrees. Their primary interest in the survey was to obtain periodic detailed information on students enrolled for advanced degrees in agriculture, biological and physical sciences, mathematics, health professions, and selected social sciences closely connected with medical research. The data are needed for administration and for planning fellowship, training, research, and facilities programs.

The Office of Education conducted both the 1959 and 1960 surveys with financial support from these two agencies. Commencing with the fall of 1961 survey, however, the Office of Education assumed financial sponsorship of the study, since the data collected serve various needs of the Office, as well as the needs of many public and private groups, and are also useful in the administering of the National Defense Education Act.

The first survey was completed during the 1959–60 academic year, and data from that survey are being extensively used. In the first survey detailed data collection was confined to 60 science-oriented fields and total figures were obtained for all other fields. While information was being collected in the first survey, many requests were received from users of educational statistics to extend the scope of the survey to cover each major field of study—not merely the 60 science-oriented fields in which the National Science Foundation and the National Institutes of Health have a special interest. These requests represented a clear mandate to the Office of Education to amplify the coverage by collecting detailed data on graduate enrollments in each major field of study. Accordingly, beginning with this survey for the fall of 1960, detailed coverage was extended to include all major fields of study in which advanced degrees are conferred.

Data from several related surveys of the Office of Education dealing with degree-credit programs of study in higher education are incorporated in this publication to show the extent to which students advance from one level of study to another in the various fields of study. Selected data on enrollment at all levels, and data on earned degrees conferred are presented and discussed in this report along with data on enrollment for advanced degrees. Analyses are made of enrollment in public and private institutions of each type; enrollment of full- and part-time students; enrollments by field of study; enrollments by region, State and institution; and enrollments for advanced degrees in selected science fields in comparison to the number of advanced degrees expected.

Scope of the Survey

Institutions included.—The report-form on students enrolled for advanced degrees was sent to all institutions of higher education in the aggregate United States [1] that were likely to have

[1] Throughout this report, the term "aggregate United States" refers to the 50 States, the District of Columbia, and Puerto Rico.

students enrolled for advanced degrees during the fall term of the 1960–61 academic year. There were 625 such institutions. This number included all institutions listed in the Educational Directory, Part 3, Higher Education 1960–61 [2] which reported to the U.S. Office of Education (for the Survey of Earned Degrees During Year 1958–59 [3]) that they had conferred advanced degrees. Only 605 of these indicated they had students enrolled for advanced degrees in the fall of 1960. The 20 others indicated that their enrollments for advanced degrees occurred only during summer sessions, or that none of their graduate students were enrolled for an advanced degree in the fall of 1960. These 20 were omitted from the report.

Students included.—The institutions were requested to include in their report all students enrolled for a second-level degree (master's except first-professional) and all students enrolled for the doctorate (Ph. D., Ed. D., etc.) who were enrolled for an advanced degree in the fall of 1960. Those who had completed their course work but had not completed other requisites for a doctor's degree (i.e., research, work on a thesis, or other prescribed activity) were to be included only if they were enrolled in the fall term of the 1960–61 academic year for completion of additional requisite work of this kind.

Detailed data on enrollments for advanced degrees were requested for each major field of study.[4] This included data on the number of full-time and part-time students in their first year of graduate work, in intermediate years of work, and in their final year of work for the doctorate.

The institutions were requested to report students enrolled for advanced degrees with a major in biology, physics, mathematics, or any other academic field listed on the report-form, who were preparing to teach in a high school or college, along with all other students enrolled for advanced degrees in the subject fields. Accordingly, students preparing to teach an academic subject were not separately identified as education majors.

Students excluded.—The institutions were re-requested to exclude postdoctoral students, special or unclassified students (or other students who were not enrolled for a degree in the fall of 1960), and to exclude correspondence students, and students in short courses or refresher courses. Also to be excluded were students enrolled for such degrees as LL.B., D.D.S., D.O., O.D., M.D., or D.V.M., which are first professional degrees in their respective fields rather than advanced degrees in the sense used here.

Definition of Terms

Students enrolled for advanced degrees were classified into three categories: first-year students, intermediate students, and terminal-year students.

First-year students.—The First-year students are those who had completed less than one full year of required work for an advanced degree (i.e., master's except first-professional and/or doctorate—Ph. D., Ed. D., etc.). Students enrolled for more than 1 year, who have completed less than 1 year of full-time work, or the equivalent in part-time work, are retained in the first-year category until they qualify as intermediate students. The distinction is based upon the amount of work completed rather than the period of enrollment.

Intermediate students.—The Intermediate students are those who had completed 1 year or more of required work for a second-level (master's except first-professional) degree or a doctor's degree, but have not entered the final year of work for a doctor's degree.

Terminal-year students.—The Terminal-year students are those the institution expected to complete all doctoral requirements by June 30, 1961. The figure was to be an estimated one. Students working for a second-level degree (master's except first-professional) were not included in the terminal-year category.

Full-time and part-time students.—Students in the first year, intermediate years, and terminal year were divided into two groups: those pursuing full-time programs of study and those pursuing

---

[2] *Education Directory 1960–61*, Higher Education (OE-5000-61), by Theresa Birch Wilkins, U.S. Department of Health, Education, and Welfare, Office of Education, Washington: U.S. Government Printing Office, 1960. 209 p.

[3] *Earned Degrees Conferred, 1958–59—Bachelor's and Higher Degrees* (Circular No. 636) by Wayne E. Tolliver and Justin C. Lewis, U.S. Department of Health, Education, and Welfare, Office of Education. Washington: U.S. Government Printing Office, 1961. 198 p.

[4] Fields of study also correspond to those used in the Office of Education survey of earned degrees.

part-time programs. The full-time students were those whose academic load (in terms of course work or other required activity, such as a thesis) was at least 75 percent of that normally recommended for such students. Time spent by teaching fellows was to be included only if their teaching was performed as a requirement for a degree. Employment not included in the prescribed activity for an advanced degree was not to be counted as a part of the time spent on graduate work. Part-time students were those carrying an academic schedule lighter than that described for full-time students.

Enrollment for Advanced Degrees

In all 4-year institutions.—Data in this circular on enrollment are confined to the institutions which may enroll students for advanced degrees. These institutions are referred to as 4-year institutions.[5] Table 1 shows that in the fall of 1960 there were 1,975 institutions of higher education with degree-credit enrollment [6] in the aggregate United States;[7] however, only 1,451 of these institutions were 4-year institutions. The remaining 524 institutions were junior colleges, and since junior colleges would not be expected to have students enrolled for advanced degrees, detailed data on these institutions are not presented in this publication.

Several 4-year institutions of higher education have added graduate programs of study in recent years. Among the 4-year institutions there were 605 (41.7 percent) which had students enrolled for advanced degrees. As compared with the preceding fall, the 1960 figures represent an increase of 11 (0.8 percent) in the number of 4-year institutions and an increase of 33 (5.8 percent) in the number of such institutions with students enrolled for advanced degrees.

Table 1 shows that the increase in enrollment for advanced degrees has not kept pace with the increase in total degree-credit enrollment in 4-year institutions. During the fall term of the 1960–61 academic year there were 314,349 students enrolled for advanced degrees, which represents an increase of 9,581, or 3.1 percent, from the preceding fall. However, total degree-credit enrollment in 4-year institutions increased 5.5 percent during the same year.

The 314,349 students enrolled for advanced degrees were distributed as follows: 197,180 (62.7 percent) in the first year of graduate work, 103,767 (33.0 percent) in intermediate years of graduate work, and 13,402 (4.3 percent) in the terminal year of work for the doctorate. (See tables 11 and 12.) Table 19 contains a breakdown by full time, part time, and by field.

The long-term trend in the annual number of doctor's degrees conferred indicates that a sizable number of the estimated 13,402 students reported by the institutions as expected to complete all doctoral requirements by June 30, 1961 will not actually complete their doctorate by that time. In September of 1959 the Office of Education estimated that 10,500 doctor's degrees would be conferred during 1960–61.[8] This number is approximately 2,900 (22 percent) lower than the 13,402 indicated by the institutions in their report. Accordingly, it can be assumed that about one out of five of the candidates expected to receive a doctor's degree by June 30, 1961 was unable to meet all of the requirements on schedule. This opinion is strengthened by the fact that when data collected in the fall of 1959, showing the expected number of terminal-year students in 60 selected science-oriented fields, were compared with the actual number conferred during 1959–60, it was disclosed that on the average the actual number conferred was 15 percent less than the estimates.

A few institutions enroll large numbers of students for advanced degrees; however, the data presented below shows that in the fall of 1960 three-fourths (74.5 percent) of the institutions with enrollment for advanced degrees have 500 or fewer such students.

---

[5] The term "4-year institutions" includes all institutions which grant bachelor's or higher degrees or some other type of recognition equivalent to such degrees (e.g., ecclesiastical recognition in a theological institution), based on at least 4 academic years of work. Both graduate and undergraduate institutions are included.

[6] The term "degree-credit enrollment" refers to enrollments in programs consisting wholly or principally of work normally creditable toward a bachelor's or higher degree.

[7] The term "aggregate United States" refers to the 50 States, the District of Columbia, and Puerto Rico.

[8] *Projection of Earned Degrees to 1969–70* (OE-54002) by Louis H. Conger, Jr., and Marie G. Fullam. U.S. Department of Health, Education, and Welfare, Office of Education, 7 p.

Number of students enrolled for advanced degrees	*Institutions in each group*	
	Number	*Percent*

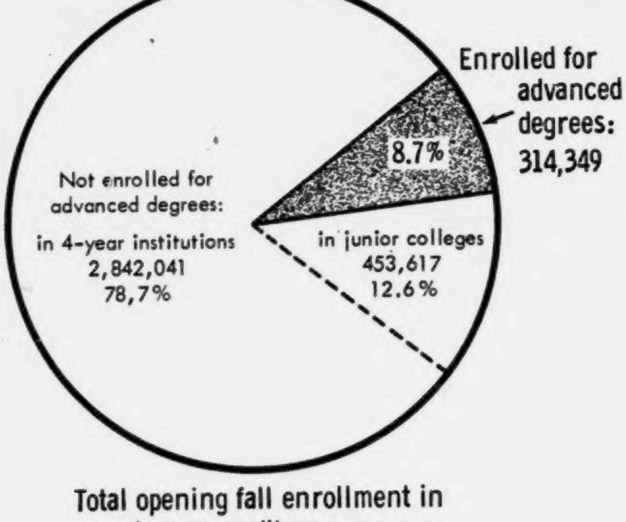
4,000 and over	10	1.7
Total	605	100.0

Detailed data on enrollment for advanced degrees have been collected for 2 consecutive years—1959 and 1960. These 2 years do not provide a sufficient period of time to develop reliable trend data on enrollments at the graduate level. However, reliable trend data on earned degrees conferred are available in the Office of Education. A study of these trends shows that from 1955–56 to 1959–60 the percentage increase in the number of degrees conferred at the bachelor's and master's level is much higher than it is at the doctor's level. During this period, the number of bachelor's degrees conferred increased 26.1 percent, master's degrees increased 25.6 percent and doctor's degrees conferred increased 10.4 percent. Table 22 shows these increases and the increase for each major area of study

Figure 1.—Enrollment for advanced degrees as a percent of total degree-credit enrollment: Fall 1960



Total opening fall enrollment in degree-credit courses: 3,610,007

Table 1.—Institutions with degree-credit enrollment, institutions with enrollment for advanced degrees; total degree-credit enrollment, and enrollment for advanced degrees: Fall 1959 and fall 1960

Not enrolled for advanced degrees	2,842,041	2,685,971	156,070	5.8

By type of institution and control.—The institutions in this publication are classified into seven major types based on their curricular and organizational characteristics. The seven types includes universities and liberal arts colleges and five types of independently organized professional schools consisting of teachers colleges, technological schools, theological and religious schools, schools of art, and all other professional schools.

The *university* category includes institutions that give considerable stress to graduate instruction, confer advanced degrees as well as bachelor's degrees in a variety of liberal arts fields, and have at least two professional schools not exclusively technological. *Liberal arts colleges,* as differentiated from universities, are institutions in which the principal emphasis is on a program of general undergraduate education. The "independently organized professional schools" consists of institutions which offer professional training but are not affiliated with universities. The five groupings of institutions within this category are:

Teachers colleges—devoted primarily to teacher training; *technological schools*—providing training predominantly in technical and physical science disciplines; *theological and religious schools*—offering programs wholly or principally in theology religion, or religious education; *schools of art*—specializing in painting, sculpture, design, drama, music, dance, etc.; and *other professional schools* (not classified above)—offering programs directed to one or more fields of specialization such as medicine, law, business, pharmacy, optometry, etc.

Details relative to numbers of institutions of each type and their enrollment appear in tables 2 through 5 and in the text immediately following.

Number of universities.—As might be expected from the description in the preceding paragraph, all universities have students enrolled for advanced degrees. In the fall of the 1960–61 academic year there were 143 universities—2 more than there were 1 year earlier. In 1960 they represented nearly one-fourth (23.6 percent) of the 605 institutions having students enrolled for advanced degrees, but only one-tenth (9.9 percent) of the 1,451 institutions which confer bachelor's and higher degrees. A year earlier, universities represented 24.7 percent of the institutions having students enrolled for advanced degrees and 9.8 percent of all the institutions which confer bachelor's and higher degrees.

In 1960 there were 83 *public universities* and 60 *private universities*—one more of each than there were in 1959. The proportions in 1960 were 58.0 percent public and 42.0 percent private. Public universities accounted for one-third (32.5 percent) of the 255 public institutions which had students enrolled for advanced degrees and one-fifth (22.1 percent) of all the 375 public institutions which confer bachelor's and higher degrees. The private universities accounted for one-sixth (17.1 percent) of the 350 private institutions which had students enrolled for advanced degrees, but only one-eighteenth (5.6 percent) of the 1,076 private institutions which confer bachelor's and higher degrees. These proportions are all approximately the same as they were in 1959.

Enrollment for advanced degrees in universities.—In the fall of 1960, one out of seven (14.2 percent) university students pursuing degree-credit work was working for an advanced degree. Total enrollment for advanced degrees in universities was 220,833—5,521, or 2.6 percent, more than it was in the fall of 1959. The 2.6-percent increase in enrollment for advanced degrees in universities from the fall of 1959 to the fall of 1960 was exceeded by increases of 10.5 percent in liberal arts colleges and 3.7 percent in technological schools. In spite of the increases, however, these latter types of institutions have not nearly approached the number of students enrolled for advanced degrees in universities. In the fall of 1960, seven out of ten (70.3 percent) of the 314,349 students working for an advanced degree were enrolled in universities. The enrollment for advanced degrees in universities was 4.4 times higher than the enrollment in liberal arts colleges which had next to the largest enrollment at the graduate level.

Enrollment for advanced degrees in *public universities* was higher in the fall of 1960 than it was in the fall of 1959, while enrollment for advanced degrees in *private universities* decreased slightly during the same period. In public universities, one out of eight students (12.0 percent) pursuing degree-credit work was working for an advanced degree. Total enrollment for advanced degrees in public universities was 119,438—7,594, or 6.8 percent more than it was in the fall of 1959. In private universities, one out of six (18.1 percent) students pursuing degree-credit work was working for an advanced degree. Total enrollment for advanced degrees in private universities was 101,395—2,073 or 2.0 percent, less than it was in 1959. Average enrollment for advanced degrees per university in the fall of 1960 was 1,544—1,439 per public university and 1,690 per private university. As compared to the previous fall these averages increased 5.5 percent in public universities and decreased 3.6 percent in private universities, for a net increase of 1.1 percent for both combined.

Number of liberal arts colleges.—In the fall of the 1960–61 academic year there were 764 liberal arts colleges—206 (27.0 percent) of them had students enrolled for advanced degrees. From the fall of 1959 to the fall of 1960 the total number of liberal arts colleges decreased by two, while the number with students enrolled for advanced degrees increased by 16. In the fall of 1960, as in other recent years, there were more liberal arts colleges with students enrolled for advanced degrees than any other type of institution—one-third (34.0 percent) of the 605 institutions with

673658 O—63——2

students enrolled for advanced degrees were liberal arts colleges. The 206 liberal arts colleges with students enrolled for advanced degrees also represented one-seventh (14.2 percent) of the 1,451 institutions of higher education which confer bachelor's or higher degrees.

There are more than 7.5 times as many *private liberal arts colleges* as there are *public*, but only 3.3 times as many with students enrolled for advanced degrees. In 1960, there were 675 private liberal arts colleges and 89 public—6 more in the private category and 2 more in the public than there were 1 year earlier. The proportions in 1960 were 88.4 percent private and 11.4 percent public. Among the private liberal arts colleges there were 158 institutions with students enrolled for advanced degrees while among the public there were 48—12 more in the private category and 4 more in the public than there were in the fall of 1959. The 158 private liberal arts colleges accounted for nearly one-half (45.1 percent) of the 350 private institutions of all types with students enrolled for advanced degrees and one-seventh (14.7 percent) of the 1,076 private institutions which confer bachelor's or higher degrees. A similar comparison shows that the 48 public liberal arts colleges accounted for only one-fifth (18.8 percent) of the 255 public institutions of all types with students enrolled for advanced degrees and one-eighth (12.8 percent) of the 375 public institutions which confer bachelor's or higher degrees. These proportions are all slightly higher than they were in 1959.

Enrollment for advanced degrees in liberal arts colleges.—In the fall of 1960, 1 out of 20 (4.9 percent) students in liberal arts colleges taking courses creditable towards a bachelor's or higher degree was working for an advanced degree. Total enrollment for advanced degrees in liberal arts colleges was 50,202—4,765 or 10.5 percent, more than it was in the fall of 1959. This increase is all attributable to a large percentage increase in the number of students enrolled for advanced degrees in *public liberal arts colleges* which was sufficient to offset a decrease in enrollment for advanced degrees in *private liberal arts colleges*. In public liberal arts colleges one out of 14 (7.2 percent) students taking degree-credit work was enrolled for an advanced degree. Total enrollment for advanced degrees in public liberal arts colleges in the fall of 1960 was 25,041—5,791, or 30.1 percent, more than there were in the fall of 1959. In private liberal arts colleges the proportion of students working for an advanced degree was much lower than it was in the public institution in this category. Only one out of 27 (3.7 percent) students in the private liberal arts colleges was working for an advanced degree. Total enrollment for advanced degrees in private liberal arts colleges was 25,161—1,026 or 3.9 percent, less than there were in the fall of 1959. Average enrollment for advanced degrees in liberal arts colleges which had students enrolled for advanced degrees was 244—522 per public and 159 per private institution in this category. As compared to the previous year these averages increased 19.2 percent in the public liberal arts colleges and decreased 11.2 in the private institutions in the category, for a net gain of 2.1 percent in both.

Number of teachers colleges.—Among the independently organized professional schools more teachers colleges had students enrolled for advanced degrees than did any other type of institution. In the fall of the 1960–61 academic year there were 198 teachers colleges—110 (55.6 percent) of them had students enrolled for advanced degrees. Proportionately, therefore, teachers colleges had more students enrolled for advanced degrees than any other type excepting universities. From the fall of 1959 to the fall of 1960 the total number of teachers colleges did not change, but the number with students enrolled for advanced degrees increased from 108 to 110. In the fall of 1960, nearly one-fifth (18.2 percent) of the 605 institutions with students enrolled for advanced degrees were teachers colleges. These same teachers colleges also represent one-thirteenth (7.6 percent) of the 1,451 institutions of higher education which confer bachelor's and higher degrees.

There are more than 5 times as many *public teachers colleges* as there are *private*, and approximately 15 times as many with students enrolled for advanced degrees. In 1960, there were 166 public teachers colleges and 32 private—1 less in the public category and 1 more in the private than there were 1 year earlier. The public teachers colleges represented the largest single group of public institutions which confer bachelor's and higher degrees—166 or 44.3 percent of the total. Among these teachers colleges there were

103 with students enrolled for advanced degrees, which also makes them the largest single group of public institutions in the advanced degree enrollment category—they accounted for 40.4 percent of the public institutions with students enrolled for advanced degrees. In sharp contrast to the data on public teachers colleges, there were only 32 private teachers colleges which confer bachelor's or higher degrees—they accounted for 3.0 percent of the private institutions. Only seven of the private teachers colleges had students enrolled for advanced degrees, which accounts for 2 percent of all the private institutions with enrollments at this level.

Enrollment for advanced degrees in teachers colleges.—Enrollment for advanced degrees in teachers colleges decreased from the fall of 1959 to the fall of 1960. In the fall of 1960, 1 out of 14 (7.0 percent) students pursuing degree-credit work in teachers colleges was working for an advanced degree. Total enrollment for advanced degrees in teachers colleges was 25,079—1,474, or 5.6 percent, less than it was in the fall of 1959. The same ratio, 1 out of 14 (6.9 percent), was applicable to the public teachers colleges. Total enrollment for advanced degrees in *public teachers colleges* was 24,033—1,266, or 5.0 percent less than it was in 1959. In *private teachers colleges* 1 out of 13 (7.9 percent) students pursuing degree-credit work was working for an advanced degree. Total enrollment for advanced degrees in private teachers colleges was 1,046—208 or 16.6 percent, less than it was in the fall of 1959. The average enrollment for advanced degrees in those teachers colleges which had students enrolled for advanced degrees was 228—233 in public teachers colleges and 149 in the private teachers colleges. As compared to the previous year these averages decreased 6.8 percent in the public teachers colleges and 16.8 percent in the private, for a net decrease of 7.3 percent in both.

Number of technological schools.—In the fall of 1960, there were 50 technological schools which confer bachelor's and higher degrees—27 (54.0 percent) of them had students enrolled for advanced degrees. From the fall of 1959 to the fall of 1960 there was a drop of one in the total number of technological schools, while the number with students enrolled for advanced degrees increased two. In 1960 the technological schools represented less than one-twentieth (4.5 percent) of the 605 institutions having students enrolled for advanced degrees and less than one-fiftieth (1.9 percent) of the 1,451 institutions which confer bachelor's and higher degrees. One year earlier, technological schools represented 4.4 percent of the institutions having students enrolled for advanced degrees and 1.7 percent of the institutions which confer bachelor's and higher degrees.

In 1960 there were 26 *public technological schools* and 24 *private*—the same number in the public category and one less in the private category than there were in 1959. The proportions in 1960 were 52.0 percent public and 48.0 percent private. In 1960, one-half (13) of the public technological schools had students enrolled for advanced degrees, while more than one-half (14) of the private institutions had students in this category.

Enrollment in technological schools.—In the fall of 1960, one out of eight (12.0 percent) students in technological schools taking courses creditable towards a bachelor's or higher degree was working for an advanced degree. Total enrollment for advanced degrees in these institutions was 12,843—458, or 3.7 percent, more than it was in the fall of 1959. In the *public technological schools* only 1 out of 21 (4.7 percent) students taking degree-credit work was enrolled for an advanced degree, while in the *private* 1 out of 6 (17.5 percent) students was working for an advanced degree. Average enrollment for advanced degrees in the technological schools with students enrolled for advanced degrees was 476—166 per public and 764 per private institution. As compared to the previous year these averages decreased 11.7 percent in the public technological schools and 1.9 percent in the private technological schools, for a net decrease of 3.8 percent in both. These figures show that, even though there was a decrease in average enrollment for advanced degrees from the fall of 1959 to the fall of 1960, the private technological schools are continuing to place strong emphasis on graduate study.

Theological and other religious schools.—These schools, which are all private institutions, numbered 176 in the fall of 1960—an increase of 3 from the fall of 1959. In 1960, 65 of these institutions (36.9 percent) had students enrolled for advanced degrees. This is five more than there were in 1959. In 1960 they represented slightly less than one-tenth (10.7 percent) of the

605 institutions having students enrolled for advanced degrees, and less than one-twentieth (4.5 percent) of the 1,451 institutions which confer bachelor's and higher degrees. These proportions are approximately the same as they were in 1959. The same institutions represented nearly one-fifth (18.6 percent) of the private institutions with students enrolled for advanced degrees and one-seventeenth (6.0 percent) of the 1,076 private institutions which confer bachelor's and higher degrees. In the fall of 1960, 1 out of 14 (7.2 percent) students pursuing degree-credit work was working for an advanced degree. Total enrollment for advanced degrees in theological and religious schools was 3,028—246, or 7.5 percent, less than it was in the fall of 1959. The average enrollment for advanced degrees per theological and religious institutions with students enrolled at this level was 47 as compared to an average of 55 in 1959.

Schools of art.—These schools numbered 45 in the fall of 1960—1 less than the total in 1959. Among these schools there were 27 with students enrolled for advanced degrees. These schools accounted for less than one-twentieth (4.5 percent) of the institutions with students enrolled for advanced degrees, and less than one-fiftieth (1.9 percent) of the institutions which confer bachelor's and higher degrees. Enrollment for advanced degrees in the schools of art was 780, which represents only 0.2 percent of the 314,349 students enrolled for advanced degrees in 1960. There was only one public school of art with students enrolled for advanced degrees. This institution had 71 students enrolled for advanced degrees. The remaining 709 students were enrolled in 26 private schools of art.

Figure 2.—Number of institutions with students enrolled for advanced degrees and enrollment for advanced degrees: Fall 1960

[1] Less than 0.05 percent.

Full-time and part-time enrollments.[9]—Many public and private organizations are concerned with the question of how rapidly students who are enrolled for advanced degrees complete their programs. To encourage students to pursue their programs of study full-time, and to stimulate a larger enrollment of gifted students, the number of graduate fellowships allocated is being continually increased. If the stipends accompanying these fellowships provided sufficient financial support, it would be possible for more students to devote full time to graduate study, thereby adding sooner to the national supply of highly qualified manpower.

It is common knowledge that a large proportion of undergraduate programs of study are pursued on a full-time basis while a much smaller proportion of graduate students pursue their programs full-time. Data collected for the fall of 1959 show that 8 out of 10 (79.7 percent) undergraduate and first-professional students enrolled in 4-year institutions were pursuing their programs of study on a full-time basis, whereas less than 4 out of 10 (37.8 percent) of those enrolled for an advanced degree were full-time students (tables 6–8). It is encouraging to note that from the fall of 1959 to the fall of 1960, the number of full-time students enrolled for advanced degrees increased 8.2 percent—8.8 percent in public institutions and 7.3 percent in private institutions (table 9). During the same year the number of part-time students enrolled for advanced degrees increased 7.0 percent in public institutions and decreased 6.7 percent in private institutions for a net gain of only 0.1 percent.

Table 10 shows the number of bachelor's and first-professional degrees conferred during 1959–60 by each type of institution and also the number of students who were enrolled as first-year graduate students in the fall of 1960 in each type of institution. Care should be exercised in drawing conclusions from these data, because parallel comparisons cannot be drawn as to the proportions of students who continue on into graduate work by type of institution.

Data collected on enrollment for advanced degrees show that there is a tremendous difference in the proportion of full-time and part-time students working for an advanced degree, among the seven major types of institutions, as between those in the public institutions and those in the private sector. In the fall of 1960, full-time enrollment for advanced degrees ranged from 72.4 percent of the total in theological and other religious schools to 11.6 percent of the total in public teachers colleges (table 13).

As students persist in their graduate programs from the first year of study to the terminal year for the doctorate, the proportion enrolled full-time increases. In the fall of 1960, one-third (35.0 percent) of the first-year students enrolled for an advanced degree were pursuing a full-time program of study, while one-half (46.2 percent) of the students in the intermediate years of study were full-time students, and six-tenths (58.1 percent) of those in the terminal year for the doctorate were full-time students (chart 4 and table 13). These data are of interest in light of the fact that financial support is more likely to be provided students who are pursuing studies beyond the first year of graduate work.

More than one-half (52.7 percent) of the full-time students enrolled for advanced degrees in the fall of 1960 were in four major areas of study—social sciences, 20,374; education, 15,578; physical sciences, 15,045, and engineering, 14,698 (table 19). Education, with 79,415 part-time students enrolled for advanced degrees in the fall of 1960, stands out prominently as the major area of study with the largest number of part-time students. Approximately 42 percent of the part-time students enrolled for advanced degrees were in education. Other major areas of study with more than 16,000 part-time students enrolled for advanced degrees were: engineering, 21,938; business and commerce, 17,868, and social sciences, 16,943.

In five major areas of study, more than 65 percent of the students enrolled for advanced degrees were full-time students—forestry, 80.5 percent; health professions, 73.8 percent; architecture, 72.8 percent; religion, 69.2 percent; and philosophy, 65.4 percent. At the other extreme, there were three major areas of study in which less than 30 percent of the students enrolled for advanced degrees were pursuing full-time programs of study—education, 16.4 percent; law, 19.6 percent, and business and commerce, 29.5 percent.

[9] See page 2 for the definition of full-time and part-time students.

[1] Includes students who have completed less than 1 full year of required work for an advanced degree.

[2] Includes all except first-year and terminal-year students.

[3] Estimated number of students who were expected to complete all doctoral requirements by June 30, 1961.

By region, State and institution.—More students are enrolled for advanced degrees in the five States and the District of Columbia which together form the Mideast region, than in any other region in the United States. In the fall of 1960 the States in the Mideast region enrolled nearly one-third (31.1 percent) of the students working for an advanced degree (table 14). This region also had the largest number of graduate students in private institutions. More than one-half (52.2 percent) of the students enrolled for advanced degrees in private institutions were in the Mideast. The proportion of the national total represented by students enrolled for advanced degrees in the Mideast region in the fall of 1960 was slightly less than it was in the fall of 1959. In 1959, 33.9 percent of the total were in the Mideast. As might be expected from these enrollment figures, the Mideast region[10] also confers the largest number of advanced degrees of any region in the United States (table 15). During 1959–60 the States in this region conferred one-fourth (25.6 percent) of the Nation's advanced degrees—25.5 percent of the second-level degrees (master's except first-professional) and 26.4 percent of the doctorates. These percents are slightly lower than they were during 1958–59. In that year, the Mideast region conferred 26.0 percent of the advanced degrees—25.8 percent of the second-level degrees and 27.6 percent of the doctorates.

The Rocky Mountain region, comprised of five States, had the smallest number of students enrolled for advanced degrees of any region. In the fall of 1960 the Rocky Mountain region enrolled a little more than one-fiftieth (2.2 percent) of the Nation's students working for an advanced degree—one-thirtieth (3.4 percent) of the students in public institutions and one one-hundredth (0.9 percent) of those in private institutions (table 14). These proportions are approximately the same as they were in the fall of 1959.

The 10 institutions reporting the largest enrollment for advanced degrees in the fall of 1960 and the 10 institutions reporting the largest number of advanced degrees conferred during 1959–60 are listed below in order of decreasing magnitude:

Institution	*Enrollment for advanced degrees: fall 1960*	*Percent of national total*
1. New York University	11,619	3.7
2. University of California	11,096	3.5
3. Columbia University	9,555	3.0
4. University of Michigan	6,680	2.1
5. University of Southern California	6,224	2.0
6. University of Pennsylvania	5,296	1.7
7. University of Minnesota	4,933	1.6
8. University of Wisconsin	4,855	1.5
9. Wayne State University	4,809	1.5
10. University of Illinois	4,634	1.5
Total	69,701	22.2

Institution	*Master's except first professional degrees conferred during 1959–60*	*Percent of national total*
1. Columbia University	2,744	3.7
2. New York University	2,362	3.2
3. University of Michigan	2,080	2.8
4. University of California	1,717	2.3
5. University of Illinois	1,309	1.8
6. Indiana University	1,239	1.7
7. University of Wisconsin	1,197	1.6
8. State University of New York	1,054	1.4
9. University of Southern California	1,025	1.4
10. University of Minnesota	898	1.2
Total	15,625	21.1

Institution	*Doctorates conferred during 1959–60*	*Percent of national total*
1. Columbia University	573	5.8
2. University of California	509	5.2
3. University of Illinois	385	3.9
4. Harvard University	372	3.8
5. University of Wisconsin	365	3.7
6. University of Michigan	291	3.0
7. New York University	282	2.9
8. Ohio State University	262	2.7
9. University of Minnesota	245	2.5
10. University of Chicago	235	2.4
Total	3,519	35.8

[10] The Mideast region is comprised of the States of Delaware, Maryland, New Jersey, New York, Pennsylvania, and the District of Columbia.

[1] Includes students who have completed less than 1 full year of required work for an advanced degree.
[2] Includes all except first-year and terminal-year students
[3] Estimated number of students who were expected to complete all doctoral requirements by June 30, 1961.
[4] Second-level degrees are master's degrees excluding those which are first professional.

Enrollment for Advanced Degrees Compared With Advanced Degrees Conferred Within Major Fields of Study

Total enrollment for advanced degrees in the 60 science-oriented fields for which data were collected in 1959 and 1960 disclose that in the fall of 1960 there were 85,735 students enrolled in these science fields—an increase from the fall of 1959 of 9,590 students, or 12.6 percent (table 16). Table 16 also shows that within the broad areas of study, the health professions made the largest percentage increase from the fall of 1959 to the fall of 1960 of any of the major areas with a reported gain of 30.1 percent. This is attributable to large percentage increases in the clinical medical sciences, nursing, and clinical veterinary medical science fields which showed increases of 80.8 percent, 58.7 percent, and 53.4 percent, respectively. Other broad areas of study which showed large percentage increases were: geography, 23.5 percent; mathematical subjects, 20.8 percent; and psychology, 19.2 percent.

The increases in the potential supply of highly skilled professional personnel indicated in the fields discussed in the previous paragraph may be related to increases in societal demands for these personnel.[11]

Continued expansion of employment in the health fields is expected in the 1960's. The demand for professional registered nurses is expected to advance rapidly. There is a particular need for nursing specialists with master's or doctor's degrees, the outlook being especially favorable for nurses with graduate training in education or administration.

In mathematics, the outlook is for continued rapid growth of employment. Particular need is indicated for mathematicians with doctorate degrees for research, teaching and applied mathematics positions. Employment of mathematicians as teachers in colleges is expected to increase substantially, both to take care of much larger enrollments and to meet the growing need for more advanced mathematical training in many fields of study. While the demand for college mathematics teachers will be largely for those with a Ph. D., it is expected that there will continue to be teaching positions for holders of master's degrees.

There is a strong demand for psychologists with Ph. D. degrees in every field of specialization. Those with master's degrees will also be in considerable demand, in spite of the increasing emphasis on the doctorate.

In geography the outlook is for moderate growth, both in the near future and over the long run. There is a major need for geographers with graduate degrees to fill research and teaching positions in colleges and universities and research jobs in industry and government.

Increases in graduate enrollment should be considered in absolute numbers as well as percentages in studies to determine whether the national needs for trained manpower in these areas are being met. This is illustrated, in part, by table 16 which shows numerical increases alongside the percentage increases. For example, enrollment for advanced degrees in the health professions increased by nearly one-third, yet only 1,351 more students were pursuing work in this area. Similarly, the increase in geography represents only 198 more students, mathematical subjects 2,026 more students, and psychology 1,720.

---

Table 16.—Enrollment for advanced degrees in selected science fields: Fall 1959 and fall 1960—Continued

Major field of study	Enrollment for advanced degrees		Increase or decrease 1959–60	
	Fall 1959	Fall 1960	Number	Percent
PSYCHOLOGY	**8,957**	**10,677**	**1,720**	**19.2**
SELECTED SOCIAL SCIENCES	**10,065**	**10,983**	**918**	**9.1**
Anthropology (includes physical anthropology)	862	1,006	144	16.7
Sociology	2,929	3,277	348	11.9
Social work, social administration [12]	6,274	6,700	426	6.8
SCIENCES, GENERAL PROGRAM [13]	**1,179**	**528**	**−651**	**−55.2**

1 Includes enrollment in specialized fields of agriculture not listed in the report such as irrigation, viticulture, etc.

2 This category was used only when there was no information on the nature of the curriculum pursued within agriculture.

3 Not computed when the base figure for the fall of 1959 is less than 50.

4 Includes curriculums oriented toward the teaching of biology in high school or college, or toward further study in specialized fields such as microbiology, entomology, genetics, etc.

5 Includes enrollment in specialized fields of biology not listed on the report such as morphology, marine biology, ecology, etc.

6 Includes only students enrolled in curriculums beyond the first professional degree. Does not include students enrolled for the first professional degree of M.D., D.D.S., Ph. D., O.D., etc.

7 Includes all students in hospital administration working for a master's degree or higher (even if the master's degree was the first professional degree). (Information needed for fellowship program of the National Institutes of Health.)

8 "Nursing Education" refers to the training of teachers of nursing.

9 Includes students enrolled for advanced degrees (beyond the D.D.S. or D.M.D.) in such clinical dental sciences as orthodontics, periodontology, etc.

10 Includes students enrolled for advanced degrees (beyond the M.D. or D.O.) in such clinical medical sciences as cardiology, neurology, surgery, etc.

11 Observe the distinction between "Physical sciences, general"—in which the biological sciences are not included—and "Sciences, general program" in which both the biological and the physical sciences are included.

12 Includes all students working for a master's degree or higher—even if the master's degree is the first professional degree. (Information needed for fellowship program of the National Institutes of Health.)

13 Includes broad, general programs consisting of a variety of courses drawn mainly from the physical sciences, the biological sciences, and mathematics.

Since we have completed one cycle of enrollment and degree surveys, it is now feasible to obtain advance information on the number of second-level and doctor's degrees conferred during 1960–61 in selected fields from the fall 1960 enrollment reports approximately one year ahead of publication of actual degree figures. Data on enrollments for advanced degrees for the fall of 1959 can be related to the number of second-level and doctor's degrees conferred during 1959–60 for some of the major science areas to obtain a ratio of degrees to enrollments. These ratios can be applied to 1960 enrollment data by field to provide advance information on degrees. The advance information on the expected number of second-level degrees to be conferred during 1960–61 in individual fields, based upon fall 1960 enrollments should be of considerable interest to all concerned with trends in the Nation's future supply of highly trained scientific manpower.

Table 17 shows the number of second-level degrees conferred during 1959–60 in 60 science-oriented fields and the expected number to be conferred during 1960–61. The procedure used in making the estimates in table 17 is experimental and its value, compared to other methods of making estimates, will be studied in future years. Column 7 of the table shows large percentage increases in the number of second-level degrees conferred from 1959–60 to 1960–61 expected in the health professions (33 percent). This is attributable to large increases expected in the clinical medical sciences, clinical veterinary-medical sciences and nursing fields. Large percentage increases are also expected in mathematics, 33 percent and psychology, 25 percent.

Table 17.—First-year enrollment for advanced degrees in fall 1959 and 1960, second-level degrees conferred during 1959–60 and expected in 1960–61 for selected science fields

Major field of study	First-year enrollment for advanced degrees		Estimating ratio (2d-level degrees in 1959–60 1st-yr. enrollments in fall 1959, or col. 5÷col. 2)	Second-level degrees

SCIENCES, GENERAL PROGRAM [13]	**966**	**464**	**.41**	**394**	**190**	**−52**

[1] Based on change in first-year enrollments for advanced degrees from fall 1959 to fall 1960.

[2] The second-level degrees expected during 1960–61 are computed separately for each line. Accordingly, the sum of the subtotals may not equal the totals.

[3] Not computed when the figure in column 2 or column 5 is less than 50.

[4] Includes enrollment in specialized fields of agriculture not listed in the report such as irrigation, viticulture, etc.

[5] This category was used only when there was no information on the nature of the curriculum pursued within agriculture.

[6] Includes curriculums oriented toward the teaching of biology in high school or college, or toward further study in specialized fields such as microbiology, entomology, genetics, etc.

[7] Includes enrollment in specialized fields of biology not listed on the report such as morphology, marine biology, etc.

[8] Includes only students enrolled in curriculums beyond the first professional degree. Does not include students enrolled for first professional degree of M.D., D.D.S., PH. G., O.D., etc.

[9] "Nursing Education" refers to the training of teachers of nursing.

[10] Includes students enrolled for advanced degrees (beyond the D.D.S. or D.M.D.) in such clinical dental sciences as orthodontics, periodontology, etc.

[11] Includes students enrolled for advanced degrees (beyond the M.D. or D.O.) in such clinical medical sciences as cardiology, neurology, surgery, etc.

[12] Observe the distinction between "Physical sciences, general"—in which the biological sciences are not included—and "Sciences, general program" in which both the biological and the physical sciences are included.

[13] Includes broad, general programs consisting of a variety of courses drawn mainly from the physical sciences, the biological sciences, and mathematics.

In the fall of 1959, and again in the fall of 1960, institutions of higher education were asked to report the estimated number of students in 60 selected science-oriented fields expected to complete all doctoral requirements by June 30 of the respective years.[12] The fall 1959 estimates have been compared with the actual number of doctor's degrees conferred in these fields during 1959–60, and the results appear in columns 2 and 5 of table 18.[13] Column 4 of the table shows that the institutions underestimated the number of doctorates conferred in agriculture by 19 percent, and geography by 26 percent. In the remaining major areas of study the institutions overestimated the number conferred. The overestimates range from 10 percent in the biological sciences to 58 percent in the health professions. The combined estimate for all of the 60 selected science-oriented fields was 18 percent higher than the number of doctorates conferred. It is believed that as the institutions gain more experience in making these estimates, their estimates will more nearly approach the actual number of degrees conferred.

The reports from the institutions for the fall of 1960 show that they anticipated a sharp upturn in the number of doctorates conferred in 1960–61 in the science fields. Some upward trend is inevitable because of swelling graduate enrollment, the development of new doctoral programs, and the acceleration made possible through increased financial aid. However, it is unlikely that the number of doctorates conferred in the 60 science-oriented fields during 1960–61 reached the institutions' estimates shown in column 3 of table 18.

[12] Institutions reported enrollments in the "terminal year" of doctoral programs.

[13] These ratios applied to 1960 figures of "terminal year" enrollments provide advance information on 1959–60 doctoral degrees by field.

If it is assumed that the rough relationship between the estimated and actual output for 1959–60 held for 1960–61, the actual number of doctorates conferred in the science fields during 1960–61 in all likelihood more nearly approached the numbers shown in column 6 of table 18 rather than the estimated numbers shown in column 3.

The number of doctorates conferred during 1959–60 in some of the major science areas and the adjusted estimates for 1960–61 are shown below:

Major areas of study	*Number of doctorates* — *Conferred in 1959–60* [1]	*Expected in 1960–61* [1]
Total in the science areas	4, 852	5, 208
Agriculture	411	497
Biological sciences	1, 205	1, 260
Geography	68	81
Health professions	99	95
Mathematical subjects	303	332
Physical sciences	1, 838	1, 919
Psychology	641	735
Selected social sciences [2]	256	286

[1] For more detailed data, see table 18.
[2] Includes anthropology, sociology, and social work-social administration.

During 1959–60 the total number of doctorates conferred was 9,829, or 2.03 times the 4,852 doctorates conferred in the science fields. If we assume that a similar relationship existed during 1960–61, the total number of doctorates conferred during that year accords with the projection of Conger and Fullam of 10,500.[14] This is one fifth lower than the 13,402 reported as terminal year students.

[14] *Projection of Earned Degrees to 1959–60* (OE-54002) by Louis H. Conger, Jr., and Marie G. Fullam. U.S. Department of Health, Education, and Welfare, Office of Education, 7 p.

Table 18.—Students in terminal year for the doctorate in the fall of 1959 and 1960, doctoral degrees conferred during 1959–60 and expected during 1960–61 on the basis of terminal-year enrollment, for selected science fields

Table 18.—Students in terminal year for the doctorate in the fall of 1959 and 1960, doctoral degrees conferred during 1959–60 and expected during 1960–61 on the basis of terminal-year enrollment, for selected science fields—Continued

Major field of study	Students in terminal year for the doctorate		Estimating ratio (doctorates in 1959–60 to terminal year students in fall 1959, or col. 5÷col. 2)	Doctoral degrees		
	Fall 1959	Fall 1960		Actual number 1959–60	Expected number in 1960–61 (col. 3x col. 4)	Expected percent change, 1959–60 to 1960–61 [1]
1	2	3	4	5	6	7
PSYCHOLOGY	**799**	**917**	**0.80**	**641**	**735**	**15**
SELECTED SOCIAL SCIENCES	**332**	**396**	**.77**	**256**	**[2] 305**	**12**
Anthropology (includes physical anthropology)	68	67	1.06	72	71	1
Sociology	183	205	.88	161	180	12
Social work, social administration	81	124	(3)	23	------------	(3)
SCIENCES, GENERAL PROGRAM [11]	**14**	**4**	(3)	**2**	------------	(3)

[1] Based on change in respondents' estimates from the fall of 1959 to the fall of 1960 (columns 2 and 3).

[2] The adjusted estimates of doctoral degrees for 1960–61 are computed separately for each line. Accordingly, the sum of the subtotals may not equal the totals.

[3] Not computed when the figure in column 2 or column 5 is less than 50.

[4] Includes enrollment in specialized fields of agriculture not listed in the report such as irrigation, viticulture, etc.

[5] This curriculum was used only when there was no information on the nature of the curriculum pursued within agriculture.

[6] Includes enrollment in specialized fields of biology not listed on the report such as morphology, marine biology, ecology, etc.

[7] Includes only students enrolled in curriculums beyond the first professional degree. Does not include students enrolled for the first professional degree of M.D., D.D.S., PH. G., O.D., etc.

[8] Includes students enrolled for advanced degrees (beyond the D.D.S. or D.M.D.) in such clinical dental sciences as orthodontics, periodontology, etc.

[9] Includes students enrolled for advanced degrees (beyond the M.D., or D.O.) in such clinical medical sciences as cardiology, neurology, surgery, etc.

[10] Observe the distinction between "physical sciences, general"—in which the biological sciences are not included—and "Sciences, general program"—in which both the biological and the physical sciences are included.

[11] Includes broad, general programs consisting of a variety of courses drawn mainly from the physical sciences, the biological sciences, and mathematics.

Table 19.—Enrollment for advanced degrees, by field of study, level, and full- and part-time status: Fall 1960

Major field of study, N.E.C	400	226	174	272	146	126	103	68	35	25	12	13
Major field not identified	2,696	647	2,049	2,069	399	1,670	622	244	378	5	4	1

[1] Includes students who had completed less than 1 full year of required work for an advanced degree.

[2] Includes students who had completed 1 or more years of required work for an advanced degree (i.e. master's except first-professional or doctor's degree) and were not expected to complete all requirements for a doctor's degree by June 30, 1961.

[3] Includes only those students who were expected to complete all doctoral requirements by June 30, 1961.

[4] Does not include *Psychology*, which has been listed independently because of its multicategory nature.

[5] Registrars were requested to report enrollments for advanced degrees with a teaching major in a particular subject field as enrollments in the field itself rather than as enrollments in "secondary education."

[6] A circular entitled *Engineering Enrollments and Degrees: 1960* (OE-54006-60, Circular No. 638), by Wayne E. Tolliver *and* Henry H. Armsby. Washington: U.S. Government Printing Office, 1961. 44 p. has been published by the Office of Education. This circular provides data on engineering enrollments by level and field of specialization.

[7] Includes all students working for a master's degree or higher—even if the master's degree is the first-professional degree. (Information needed for fellowship program of the National Institute of Health.)

[8] Does not include *geography*, which, because of its multicategory nature, has been listed independently.

[9] Does not include *geography, philosophy,* or *psychology,* which has been listed independently—in alphabetical order, because of their multicategory or comphrehensive nature.

[10] Includes all students working for a master's degree or higher—even if the master's degree is the first-professional degree.

Table 20.—Percent distribution of enrollment for advanced degrees within each major field of study, by level, and full- and part-time status: Fall 1960

[1] Includes students who have completed less than 1 full year of required work for an advanced degree.

[2] Includes all except first-year and terminal-year students.

[3] Estimated number of students who were expected to complete all doctoral requirements by June 30, 1961.

Table 21.—Enrollment for advanced degrees, by level, in 60 selected fields in fall 1960 with percentage change from fall 1959

Major field of study	Enrollment for advanced degrees, fall 1960				Percent changes from fall 1959

Sociology	3,277	1,805	1,267	205	11.9	21.5	0.6	12.0
Social work, social administration [15]	6,700	4,339	2,237	124	6.8	12.4	−4.2	53.1
SCIENCES, GENERAL PROGRAM [16]	**528**	**464**	**60**	**4**	**−55.2**	**−52.0**	**−69.9**	(2)

[1] Not computed when base figure is smaller than 50.

[2] Not computed when base figure is smaller than 25.

[3] Includes enrollment in specialized fields of agriculture not listed in the report such as irrigation, viticulture, etc.

[4] No enrollment reported in 1959.

[5] This category was used only when there was no information on the nature of the curriculum pursued within agriculture.

[6] No enrollment reported in 1959.

[7] Includes curriculums oriented toward the teaching of biology in high school or college, or toward further study in specialized fields such as microbiology, entomology, genetics, etc.

[8] Includes enrollment in specialized fields of biology not listed on the report such as morphology, marine biology, ecology, etc.

[9] Includes only students enrolled in curriculums beyond the first professional degree. Does not include students enrolled for the first professional degree of M.D., D.D.S., Ph. G., O.D., etc.

[10] Includes all students in hospital administration working for a master's degree or higher (even if the master's degree was the first professional degree) (Information needed for fellowship program of the National Institutes of Health.)

[11] "Nursing Education" refers to the training of teachers of nursing.

[12] Includes students enrolled for advanced degrees (beyond the D.D.S. or D.M.D.) in such clinical dental sciences as orthodontics, periodontology, etc.

[13] Includes students enrolled for advanced degrees (beyond the M.D. or D.O.) in such clinical medical sciences as cardiology, neurology, surgery, etc.

[14] Observe the distinction between "Physical Sciences, general"—in which the biological sciences are not included—and "Sciences, general program" in which both the biological and the physical sciences are included.

[15] Includes all students working for a master's degree or higher—even if the master's degree is the first professional degree. (Information needed for fellowship program of the National Institutes of Health.)

[16] Includes broad, general programs consisting of a variety of courses drawn mainly from the physical sciences, the biological sciences, and mathematics.

Table 22.—Advanced degrees conferred by major area of study and sex during 1959–60 with percent change from 1955–56

[1] Not computed when base figure (1955–56) is smaller than 25.

[2] Not computed when base figure (1955–56) is smaller than 50.

[3] No degrees reported in 1955–56.

[4] Does not include degrees conferred in home economics education.

Time Schedule and Response

Initial mailing of report forms to registrars was made on December 22, 1960. Followup letters and telegrams were sent as necessary, and finally a few telephone calls were made in mid-March to remind late respondents to send in their forms. Reports were carefully analyzed and letters were sent, as necessary, to institutions requesting verification or revision of reported data. Collection and verification of data was completed on April 7, 1961. At that time, reports had been received from all of the 605 institutions in the survey. Estimates were made by the Office of Education for parts of reports from six institutions which could not provide all of the data requested.

Accuracy of Data

Before the figures of any institution were accepted for publication in this circular, the Office of Education verified them. The verification process consisted primarily of analyzing the data in the light of (1) the institution's report of enrollment for advanced degrees for the fall of 1959; (2) the graduate enrollment previously reported by the institution for the Office of Education's most recent comprehensive report on enrollment; (3) the number of advanced degrees conferred in each major field of study as reported in the survey of earned degrees conferred during 1959-60; (4) voluntary letters, notations, or explanations accompanying the figures reported by the institution; and (5) information about the institution's curriculum(s) as described in its current catalog. If a significant inconsistency or discrepancy appeared among the various sources cited, or if there were any apparent departure from the directions printed on the survey form, a letter of inquiry (or telegram or telephone call) was addressed to the registrar to obtain clarification or verification of data. As a result of these efforts the Office of Education obtained complete information from 599 of the 605 institutions in the survey. Data missing from the six incomplete returns were estimated by the Office.

In view of the fact that the response rate was 100 percent, and that the reported data have been verified, all figures in this circular have been reported to the unit digit. Due cognizance is given, however, to the fact that this level of precision may not be applicable to all figures reported.

1/ Includes students who had completed less than one full year of required work for an advanced degree.

2/ Includes students who had completed one or more years of required work for an advanced degree (i.e. master's except first-professional or doctor's degree) and were not expected to complete all requirements for a doctor's degree by June 30, 1961.

3/ Includes only those students who were expected to complete all doctoral requirements by June 30, 1961.

4/ Does not include psychology, which, because of its multicategory nature, has been listed independently.

5/ Registrars were requested to report enrollments for advanced degrees with a teaching major in a particular subject field as enrollments in the field itself rather than as enrollments in "secondary education."

6/ A circular entitled Engineering Enrollments and Degrees: 1960 (OE-54006-60, Circular No. 638), by Wayne E. Tolliver and Henry H. Armsby. Washington: U. S. Government Printing Office, 1961. 44 p. has been published by the Office of Education. This circular provides data on engineering enrollments by level and field of specialization.

7/ Includes all students working for a master's degree or higher—even if the master's degree is the first-professional degree. (Information needed for fellowship program of the National Institute of Health.)

8/ Does not include geography, which, because of its multicategory nature, has been listed independently.

9/ Does not include geography, philosophy, or psychology, which, because of their multicategory or comprehensive nature, have been listed independently—in alphabetic order.

10/ Includes all students working for a master's degree or higher—even if the master's degree is the first professional degree.

1/ First-year students are those who have completed less than one full year of required work for an advanced degree.

2/ Intermediate students are those who have completed one or more years of required work, but will not complete all DOCTORAL requirements by June 30 of the current sch year.

3/ Terminal-year students are those who are expected to complete all DOCTORAL requirements by June 30 of the current school year.

4/ Estimated.

U. S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE
Office of Education
Washington 25, D. C.

TO THE REGISTRAR:

This is the second SURVEY OF STUDENTS ENROLLED FOR ADVANCED DEGREES. Much valuable information obtained in the first survey is already being put to good use. Several reports including Office of Education Circular No. 625 have been issued summarizing the results and a comprehensive Office of Education circular is being prepared based on it.

Data to be collected in this survey are needed by the National Science Foundation, National Institutes of Health, and the Office of Education for planning fellowship, training, research and facilities programs. The usefulness of these data, however, extends far beyond the specific needs of these agencies. The data will serve many other groups who have been requesting graduate enrollment statistics.

The enclosed report-form includes all major fields of study in which advanced degrees have been conferred. It has been expanded from last year's form which contained only 60 fields of study. This expansion was requested by institutions of higher education and by government and private agencies which have specific needs for graduate enrollment data. *Institutions that award DOCTORAL degrees in certain science fields are requested to complete the enclosed supplemental report-form (the tinted form) to supply additional data needed relative to "Intermediate level students" enrolled in these specific science fields. This information is being collected to meet the special needs of the National Institutes of Health, but should, like the regular report-form, be returned to the Office of Education for processing.*

Detailed directions for completion of the survey-form are given below. Please read the directions carefully, to insure that enrollments for advanced degrees in your institution will be correctly reported and published.

Your cooperation in completing the report-form and returning it promptly will be deeply appreciated.

Sincerely yours,

Virgil R. Walker

Virgil R. Walker, Director
Educational Statistics Branch

DIRECTIONS

For Survey of Students Enrolled for Advanced Degrees: Fall 1960

A. TIME PERIOD. Report enrollment as of the fall term of the current academic year. Do *not* include summer school enrollment. Please complete the form as promptly as possible, and return it to the Office of Education, Department of Health, Education, and Welfare, Washington 25, D.C.

B. STUDENTS TO BE INCLUDED. Include all students enrolled for a *second-level degree* (master's, except first-professional) and *all* students enrolled for the *doctorate* (Ph. D., Ed. D., etc.). Students who have completed their course work but have not yet completed other requisites for a doctoral degree (i.e., research, or work on a thesis or other prescribed activity) are to be included *only if currently enrolled* for completion of such requisite additional work.

C. DO NOT INCLUDE: "Post-doctoral students"; "special or unclassified students" or other students who are not enrolled for a degree; correspondence students; students in short courses or "refresher" courses; "auditors". Also do *not* include students studying for such degrees as L.L.B., M.D., D.O., O.D., or D.V.M., which are first-professional degrees rather than "advanced degrees" *in the sense here used*.

D. BRANCH INSTITUTIONS. Please be sure to indicate, on the first page of the report-form, whether your report includes or excludes enrollment at branches (if any) of your institution.

E. CLASSIFICATION OF ENROLLMENT WITH RESPECT TO MAJOR FIELD OF STUDY. The general rule is to classify enrollment for advanced degrees in the field in which the degree will be conferred. Please classify enrollments for advanced degrees as *specifically* as the list of fields in the report-form permits. Thus, enrollment for an advanced degree with a major in *Accounting* should be reported in "Accounting" (Item 2001), NOT in "Business and Commerce, general" (Item 2053). Enrollment for advanced degrees in fields which

are not listed in the report-form should be consolidated with the listed fields if such consolidation is appropriate. Thus, enrollment for a degree with a major in –

Sculpture should be reported in "Fine and Applied Arts, all other" (Item 3214)

Astrophysics should be reported in "Astronomy" (Item 6804)

Pharmaceutical Chemistry should be reported in "Chemistry" (Item 6807)

Geochemistry should be reported in "Earth Sciences, all other" (Item 6828)

Industrial Design should be reported in "Fine and Applied Arts, all other" (Item 3214) or in "Architecture" (Item 1400) – depending on the nature of the curriculum.

If the field of study does not fit into any of the listed items, name the field and enter the number enrolled in the field under item 8316, "Major field not identified." Examples: Archeology, Demography, History of Science, Medical Arts.

F. GROUPING OF STUDENTS INTO YEARS OF STUDY. Please note that students enrolled for advanced degrees are classified into three categories–first year students, intermediate students, and terminal-year students. An explanation as to which students go into these categories is given in the three sub-paragraphs below:

1. FIRST YEAR STUDENTS. Report in column 2 and 3 under heading, "First Year Students," those students who have completed *less than one full year of required work for an advanced degree*, rather than those who have been enrolled for less than one full year. To illustrate: students who have been enrolled for more than one year, but have completed *less than one full year of required work* for an advanced degree are to be reported as "First Year Students." The distinction is based upon the amount of *work completed rather than the period of enrollment.*

2. INTERMEDIATE STUDENTS. Report in columns 4 and 5 under the heading, "Intermediate Students," students who have completed one year or more of required work, in a program requiring more than one year of graduate work but who *do not* qualify for inclusion as *terminal-year students* in columns 6 and 7.

3. TERMINAL-YEAR STUDENTS. Report in columns 6 and 7 under the heading, "Terminal-Year Students," the *estimated number* of students who are expected to complete all *doctoral* requirements by June 30 of the current academic year. *No students enrolled for a second level degree (master's except first-professional) are to be reported in the terminal year columns.*

G. FULL-TIME AND PART-TIME. With respect to students enrolled for advanced degrees, a *full-time student* is one whose academic load–in terms of course work or other required activity, (such as a thesis)–is at least 75 percent of that normally recommended for such students. Time spent by teaching fellows should be included only if such teaching is performed as a *requirement* for a degree. Employment which is not a part of the prescribed activity for an advanced degree should *not* be counted as part of the time spent on graduate work. A *part-time* student is one who is carrying an academic schedule lighter than that of a full-time student. (Note: The definitions in this paragraph are provided for guidance rather than rigid application).

H. GROUPING OF SUBJECT-FIELDS. Please examine the report-form, to observe how the various fields of study have been grouped. All of the subject-fields have been classified under the following 22 capitalized headings:

1000 AGRICULTURE
1400 ARCHITECTURE
1700 BIOLOGICAL SCIENCES
2000 BUSINESS AND COMMERCE
2300 EDUCATION
2600 ENGINEERING
2900 ENGLISH AND JOURNALISM
3200 FINE AND APPLIED ARTS
3500 FOREIGN LANGUAGES AND LITERATURE
3800 FORESTRY
4100 GEOGRAPHY
4400 HEALTH PROFESSIONS
4700 HOME ECONOMICS
5000 LAW
5300 LIBRARY SCIENCE
5600 MATHEMATICAL SUBJECTS
6500 PHILOSOPHY
6800 PHYSICAL SCIENCES
7100 PSYCHOLOGY
7400 RELIGION
7700 SOCIAL SCIENCES
8300 BROAD GENERAL CURRICULUMS AND MISCELLANEOUS FIELDS

I. SKIPPING OF INAPPLICABLE SECTIONS. If your institution does not enroll students for advanced degrees in one or more of the 22 subject areas listed in paragraph "H" above, *you may skip all of the items under that heading.* Thus, most registrars will properly skip the entire section headed "AGRICULTURE." Similarly, many will properly skip the sections on "HEALTH PROFESSIONS" and on "RELIGION." Many liberal arts colleges and specialized professional schools will skip the section on "EDUCATION." Technological schools will generally skip the section on "FINE AND APPLIED ARTS." Men's colleges will skip the section on "HOME ECONOMICS." *Appropriate skipping* can speed the completion of your report without injury to quality or accuracy.

J. DIRECTIONS FOR COMPLETING SPECIFIC LINE ITEMS WITHOUT THE SUBJECT-FIELD GROUPS:

AGRICULTURE

1. Do *not* include under *"Agriculture"*:

Agricultural Economics	report in item 7731
Agricultural Education	report in item 2345
Agricultural Engineering	report in item 2600
Botany	report in item 1707
Entomology	report in item 1733
Forestry	report in item 3800
Genetics, incl. exp'tal breeding	report in item 1736
Home Economics Education	report in item 2345
Home Economics	report in item 4700
Landscape Architecture	report in item 1400
Plant Pathology	report in item 1751
Plant Physiology	report in item 1754

2. Report in item 1031, *"Agriculture, other specific major fields,"* enrollment for advanced degrees in such fields as irrigation, viticulture, etc. Do not include in item 1031 enrollment in fields specifically excluded by paragraph J. 1 above.

3. Use item 1037, *"Agriculture–Not further classified"*, *only* when there is *no information* on the nature of the curriculum pursued within Agriculture.

ARCHITECTURE

4. Students enrolled for advanced degrees in "Architectural Engineering" should be reported as part of "Engineering" in item 2600, and *not* in "Architecture," item 1400.

BIOLOGICAL SCIENCES

5. Report in item 1757, *"Biological Sciences, other specific major fields,"* enrollment for advanced degrees in specialized biological science curriculums not listed on the report-form, such as morphology, marine biology, ecology, etc. Do *not* include enrollment in such specialties as cardiology, opthalmology, radiology, orthodontics, etc. (See items 4410-4456, "Health Professions".)

BUSINESS AND COMMERCE

6. Do not include under "Business and Commerce":
Business Education—————— report in item 2325
Commercial Education—————— report in item 2325
Economics—————————— report in item 7713
Foreign Service Programs
(consular and diplomatic)———— report in item 7749
Industrial Relations—————— report in item 7749

7. Use item 2056, *"Business and Commerce—Not further classified,"* only when there is no information on the nature of the curriculum pursued within Business and Commerce.

EDUCATION

8. Items 2301-2368, "Education." In line with the general rule stated in paragraph E, students enrolled for advanced degrees in academic subjects should be reported in the subject matter field. For example, students enrolled for degrees in academic subjects, such as English, Biology, Mathematics, and History should be reported in *"English"* (item 2901), and *"Biology"* (item 1704), "Mathematics" (item 5601), and "History" (item 7716) and not as "Specialized Teaching Fields" or "Secondary Education."

9. Report in item 2345, *"Specialized Teaching Fields, other specific major fields"*, students enrolled for an advanced degree in education with a major in Health Education, Recreation, Education of Exceptional Children, Education of Mentally Retarded, Agricultural Education, Distributive Education (retail selling), Home Economics Education, Science Education, Trade and Industrial Education.

10. See paragraphs J. 8 and J. 9 above.

11. Report in item 2368, *"General Teaching Fields, other"*, students enrolled for an advanced degree in a unified elementary and secondary education curriculum, adult education curriculum, or other general teaching field. Also review paragraphs J. 8 and J. 9 above before completing this item.

12. Do *not* include under "Non-Teaching Fields" (items 2373-2377) enrollments in School Librarianship, or School Library Science. Enrollments for Advanced degrees in "School Librarianship" or "School Library Science" are to be reported in item 5300.

13. Students majoring in *"Counseling and Guidance"* are to be reported in item 2372 if they are enrolled for an advanced degree in *Education* or in item 7103 if they are enrolled for an advanced degree in *Psychology*.

14. Report in item 2374, *"Education, general (without specific concentration),"* enrollments for advanced degrees based on unspecialized work in education, usually accompanied by some work in another field such as Biology, Physics or Mathematics. For inclusion in item 2374, the work on Education must predominate (i.e., comprise more than half the student's work for the degree).

15. Use item 2383, *"Education-not further classified,"* *only* when there is *no information* on the nature of the curriculum pursued within Education.

ENGINEERING

16. The figure for column 8, item 2600, "Engineering," should be consistent with the sum of the total at the bottom of page 3 of Form RSH-7B(60), "Survey of Engineering Enrollment: Fall 1960." Form RSH-7B(60) is sent only to institutions conferring degrees in Engineering. Only those institutions which have enrollment to report on page 3 of Form RSH-7B (60) are to complete this item for the "Survey of Enrollment for Advanced Degrees." Columns 2 through 7 of item 2600 may be estimated if actual data are not available.

ENGLISH AND JOURNALISM

17. Do *not* include under "English and Journalism":
Linguistics————————— report in item 3501
Speech Correction——————— report in item 2316
Speech and Dramatic Arts————— report in item 3207
Teaching of English as a
Foreign Language——————— report in item 8310

FINE AND APPLIED ARTS

18. Report in item 3214, *"Fine and Applied Arts, all other,"* enrollments for advanced degrees in Fine and Applied Arts curriculums not listed in the report-form such as: History of Art, Painting, Drawing, Photography, Illustration, Sculpture, Ceramic Arts, Dance and Choreography, Motion Pictures, Radio and/or TV, Textile Design, Fashion Design, Interior Decoration and Design, Advertising Design, Industrial Design, etc.

FOREIGN LANGUAGES AND LITERATURE

19. Do *not* include under *"Foreign Languages and Literature:"*
Area Studies, Regional Studies——— report in item 7710
Teaching of English as a
Foreign Language——————— report in item 8310

20. Report in item 3528, *"Philology and Literature of Romance Languages,"* and item 3548, *"Philology and Literature of Germanic Languages,"* enrollments for advanced degrees requiring a broad study of the field. Do *not* include enrollments for advanced degrees based on study of a single language of the group.

HEALTH PROFESSIONS

21. Items 4410-4456, *"Health Professions."* The general rule is to report *only* students enrolled in curriculums beyond the first-professional degree. Do *not* include students enrolled for the M.D., D.D.S., Ph. G., O.D., etc.—degrees which are first-professional degrees in the sense used here.

22. Report in item 4410, *"Hospital Administration,"* all students in Hospital Administration working for a master's degree or higher (even if the master's degree is, in fact, only the first-professional degree). This information is needed for the fellowship program of the National Institutes of Health.

23. Exclude *Nursing Education* from item 4419, *"Nursing." Nursing Education* refers to the training of teachers of nursing.

24. Report in item 4446, *"Clinical dental sciences,"* *only* students enrolled for advanced degrees beyond the D.D.S. or D.M.D. in such clinical dental sciences as orthodontics, periodontology, etc.

25. Report in item 4449, "Clinical medical sciences," *only* students enrolled for advanced degrees beyond the M.D. or D.O. in such medical sciences as cardiology, neurology, surgery, etc.

HOME ECONOMICS

26. Report in item 4700, *"Home Economics,"* students enrolled for advanced degrees in Home Economics, general curriculums, and those enrolled with specific majors such as Child Development — Family Relations, Clothing and Textiles, Foods and Nutrition, Institution Management — Institution Administration, Family Economics and Management, Home Furnishings, Housing and Equipment, etc. Do *not* include under "Home Economics:"
Home Economics Education———— report in item 2345
Hotel and Restaurant
Administration—————— report in item 2050
Food Technology—————— report in item 1016

LAW

27. Report in item 5000, *"Law," only* students enrolled in curriculums beyond *the first professional* degree. Do *not* include students enrolled for the first professional degree of L.L.B. In most institutions the J.D. is a first professional degree; in such cases do *not* include students enrolled for the J.D. in this report.

LIBRARY SCIENCE

28. Report in item 5300, *"Library Science,"* students enrolled for advanced degrees in general library curriculums,

or specialized curriculums in Public Library Service, School Library Service, College Librarianship, etc.

In Library Science, the master's degree is typically preceded by an academic bachelor's degree, rather than a professional degree in the same, or closely related field. Where this is the case, enrollments for the master's degree in Library Science (M.L.S.) should not be reported. Report enrollment for advanced degrees in Medical Records Librarianship and in Records Management in item 8316 rather than in item 5300.

PHILOSOPHY

29. Include in item 6504, "*Scholastic Philosophy,*" enrollments for advanced degrees in Philosophy in Roman Catholic Institutions of higher education.

PHYSICAL SCIENCES

30. Observe the distinction between item 6801, "*Physical Sciences, general,*" in which the Biological Sciences are *not* included and item 8304, "*Sciences, General Program,*" in which *both* the biological and physical sciences are included.

RELIGION

31. Report in item 7414, "*Religion, all other,*" students enrolled for advanced degrees in Religious Education and Bible, Religion (liberal arts curriculum, nonsectarian), and enrollments for advanced degrees in cannon law or similar specialities. Report enrollments for advanced degrees in "*Sacred Music*" in item 3204, *not* in item 7414. Do *not* include in this report enrollments in curriculums leading specifically to the first professional ministerial degree.

SOCIAL SCIENCES

32. Item 7710, "*Area Studies, Regional Studies,*" refers to organized curriculums bearing particularly on a foreign country or region. The curriculums may include basic courses in the language(s) and literature of the country or region as well as courses on geographic characteristics, the system of government, historical development, international relations, economic aspects, educational program, religious beliefs, mores, folklore, etc.

33. Report in item 7740, "*Public Administration,*" all students in Public Administration working for a master's degree or higher (even if the master's degree is, in fact, the first professional degree in this field, please include these students for purposes of this report, since these data are needed by the USOE).

34. Report in item 7743, "*Social Work, Social Administration,*" students working for a master's degree or higher (even if the master's degree is, in fact, only the first professional degree). This information is needed for the fellowship program of the National Institutes of Health.

35. Report in item 7749, "*Social Sciences, all other,*" students enrolled for advanced degrees in: Social Sciences, general curriculum; American Civilization; American Culture; Foreign Service Programs (consular and diplomatic service); Industrial Relations; etc. Do *not* include:

Geography——————report in item 4100
Social Psychology——————report in item 7103
Hospital Administration——————report in item 4410

BROAD GENERAL CURRICULUMS AND MISCELLANEOUS FIELDS

36. Report in item 8301, "*Arts, General Program (without major field),*" enrollments for advanced degrees based on a variety of courses drawn mainly from the fields of literature, foreign languages, social sciences, philosophy, psychology, fine arts, etc.

37. Report in item 8307, "Arts and Sciences, General Program", enrollments for advanced degrees based on a broad variety of courses drawn mainly from the fields of the humanities (including literature, philosophy, etc.), science and social sciences.

38. Report in item 8310, "*Teaching of English as a Foreign Language,*" students enrolled for advanced degrees in programs which are designed *to train for the teaching of English as a foreign language. Do not* include students who are learning English for other purposes.

39. Report in item 8313, "Major field of study not classifiable above," enrollments for advanced degrees in fields of study not covered in the report-form, such as: Archaeology, Paleontology, Demography, History of Science, Medical Art, Medical Records Librarianship, Records Management, etc.

40. Item 8316, "*Major field not identified,*" should *not* be used except in unusual cases where information is missing relative to the name of the major field of study.

41. Item 9800, "*Total Enrollment for Advanced Degrees,*" should include all students enrolled for advanced degrees in the major subject-fields listed on the survey-form in bold face type. They also are the fields with numbers ending in "00." As an internal consistency check, it is suggested that all of the figures for the subject fields identified with numbers which *do not* end in "00" be added. If the sum of the figures is the same, the data in the form is consistent, and the totals for each column should be entered in line 9800. *DO NOT* enter the sum of the subject fields ending in digits "00", plus the sum of the subject fields which do not end in digits "00" on line 9800, because your total will be twice its actual size.

A Statistical Comparison of Graduate Degrees Awarded by Members of the Association of Graduate Schools and by all U.S. Universities, 1957–58 (OE–54011), by John L. Chase, James H. Blessing, and Grandis L. King. U.S. Department of Health, Education, and Welfare, Office of Education, 1960. 27 p.

This is a report on the number of doctoral and master's degrees awarded by the Association of Graduate Schools in the four major disciplines of arts and sciences and in the major fields of each discipline, and also compares these figures with the numbers of degrees awarded by all U.S. universities and colleges.

A Statistical Comparison of Professional and Graduate Degrees Awarded by Members of the Association of Graduate Schools and by all U.S. Universities, 1957–58 (OE–54018), by John L. Chase. U.S. Department of Health, Education, and Welfare, Office of Education, 1961. 55 p.

Presents data on graduate degrees in the fields omitted from the earlier study "A Statistical Comparison of Graduate Degrees Awarded by Members of the Association of Graduate Schools and by all U.S. Universities, 1957–58" (OE–54011), and adds data for degrees in professional fields at all levels.

Census of Graduate Students in Basic and Applied Natural Sciences in the United States and Possessions as of April 1, 1958. The Fellowship Office, Office of Scientific Personnel, National Academy of Sciences—National Research Council. Washington: The Council, 1958. 181 p.

This is a one-time survey containing data limited basically to a table that shows graduate student enrollment in basic and applied natural sciences.

Doctoral Study: Fellowships; Capacity of Graduate Schools (Circular No. 646), by John L. Chase. U.S. Department of Health, Education, and Welfare, Office of Education. Washington: U.S. Government Printing Office, 1961. 65 p.

Presents figures on fellowships awarded during 1959–60 by doctoral-granting institutions, by field of study; discusses the capacity of graduate schools for expansion and barriers to expansion.

Earned Degrees Conferred, 1959–60—Bachelor's and Higher Degrees (Circular No. 636), by Wayne E. Tolliver. U.S. Department of Health, Education, and Welfare, Office of Education. Washington: U.S. Government Printing Office, 1961. 207 p.

This is a report on the 13th annual survey of earned degrees conducted by the U.S. Office of Education, showing degrees granted in 160 fields, by institution, field, and level for men and women separately.

Engineering Enrollments and Degrees, 1960 (Circular No. 638), by Wayne E. Tolliver and Henry H. Armsby. U.S. Department of Health, Education, and Welfare, Office of Education. Washington: U.S. Government Printing Office, 1960. 44 p.

This is a report on the 12th annual survey of engineering enrollments and degrees conducted under the joint auspices of the U.S. Office of Education and the American Society for Engineering Education. Contains a detailed report and analysis of Engineering enrollments and degrees in the United States and outlying parts, by level, curriculum, type of institutional control, and institution.

Engineering Enrollments and Degrees in Institutions with ECPD—Accredited Curriculums: 1960, by Wayne E. Tolliver and Henry H. Armsby. *Journal of Engineering Education*, Vol. 51, No. 6. February 1961.

Provides institutional and national data on engineering enrollments and degrees for institutions in which one or more engineering curriculums are accredited by the Engineers Council for Professional Development.

Graduate Student Enrollment and Support in American Universities and Colleges, 1954 (NSF .57–17). The National Science Foundation. Washington: U.S. Government Printing Office, 1957. 302 p.

A one-time survey presenting the results of a nationwide survey of graduate student enrollment and support in the spring of 1954, together with some additional information that serves to put the findings in a broader educational context.

Occupational Outlook Handbook, 1961 edition (Bulletin No. 1300). U.S. Department of Labor, Bureau of Labor Statistics. Washington: U.S. Government Printing Office, 1961. 830 p.

Provides a summary of facts on many fields of employment. For each field it provides information on the nature of work, where people are employed, in that field, training and qualifications needed, employment outlook, earnings, and where to obtain more information.
